

MOHAMED SENATOR

SYSTEMS ADMINISTRATOR | CLOUD INFRASTRUCTURE & AUTOMATION

Location: Algiers, Algeria | Phone: +213 554 117 685 | Email: mohamed.senator@icloud.com
LinkedIn: linkedin.com/in/mohamedsenator | GitHub: github.com/s3nafps | Portfolio: s3nafps.github.io

PROFESSIONAL SUMMARY

Systems Administrator with 4+ years of experience supporting Windows, virtualization, network, and security-sensitive infrastructure across government, manufacturing, and enterprise environments serving 4,000+ users. Built PowerShell automation and dashboards that reduced a recurring three-hour health-check process to approximately five minutes. Collaborates with systems, network, cybersecurity, audit, and management stakeholders, with hands-on portfolio work in Terraform, GCP, private GKE, CI/CD, Linux, and Docker.

TECHNICAL SKILLS

Cloud & Infrastructure as Code: Google Cloud Platform, Terraform, GKE, Compute Engine, VPC, IAM, IAP, Cloud NAT, Artifact Registry, GCS remote state

Automation & DevOps: PowerShell, Bash, Git, GitHub Actions, CI/CD, Docker, Kubernetes, infrastructure validation and reporting

Windows Infrastructure: Windows Server, Active Directory, Group Policy, Microsoft Exchange, Microsoft 365, Windows Admin Center, Microsoft Configuration Manager (SCCM/MECM)

Virtualization: VMware vSphere, Hyper-V; administration of 20+ virtual machines

Networking & Security: TCP/IP, LAN/WAN, Cisco, Fortinet FortiGate, PKI, vulnerability remediation, patch management, least-privilege access

IT Operations: GLPI, ServiceNow, Nextcloud, infrastructure monitoring, incident management, remote administration, system auditing, technical documentation

Professional Strengths: cross-functional collaboration, stakeholder reporting, project planning, technical documentation, user training, and incident coordination

PROFESSIONAL EXPERIENCE

Autorité Gouvernementale de Certification Électronique (AGCE)

Feb 2025 - Present

IT Support & Systems Administration | Algiers, Algeria

- Administer Windows infrastructure in an air-gapped environment through Windows Admin Center, improving centralized visibility and day-to-day system management.
- Engineer and maintain 3+ PowerShell automation tools for health checks, system audits, data collection, operational reporting, and troubleshooting across isolated systems.
- Operate an automated weekly health-check workflow that reduces execution time from approximately three hours to five minutes - a reduction of about 97% - while improving the consistency and accuracy of reported results.
- Deliver clear dashboards used by management, cybersecurity, and audit teams to review system health, patch status, audit findings, and operational KPIs.
- Coordinate endpoint and system patch deployment through Microsoft SCCM, together with hardware maintenance across security-sensitive infrastructure, covering pre-deployment testing, change planning, rollout tracking, post-change validation, and recovery readiness.
- Standardize operating procedures and task plans, track recurring work through GLPI and Nextcloud, and coordinate team activities in a security-sensitive environment.

Agrofilm Packaging Algeria

Feb 2024 - Aug 2024

IT Support Engineer - Contract | Algeria

- Contributed to rebuilding and optimizing system and network infrastructure across multiple sites through planning, deployment, configuration, and stabilization activities.
- Resolved local and remote user, system, and connectivity incidents across sites, helping maintain approximately 95% infrastructure availability.

Samsung

Dec 2022 - Dec 2023

IT Support / Infrastructure Support | Algeria

- Collaborated with systems and network teams to deploy and optimize greenfield Windows, network, virtualization, and security infrastructure across multiple sites.
- Administered 20+ virtual machines across VMware vSphere and Hyper-V and maintained Active Directory, Microsoft Exchange, Cisco, and Fortinet FortiGate services.
- Resolved local and remote infrastructure, access, endpoint, and network incidents for 500+ users while contributing to approximately 99% SLA compliance.
- Deployed and configured hardware and software, authored infrastructure and support procedures, and delivered user guidance and training.

IRIS SATEREX

May 2022 - Nov 2022

IT Support - Contract | Algeria

- Monitored manufacturing IT infrastructure and resolved user, system, and network incidents through GLPI and ServiceNow in a shift-based production environment.
- Executed technical interventions in response to infrastructure alerts, helping sustain continuous operations and approximately 95% infrastructure availability.

Brandt Algeria

Apr 2021 - Apr 2022

IT Support Technician | Algeria

- Resolved 150+ GLPI tickets per month in an enterprise environment serving 4,000+ users, contributing to approximately 99% SLA compliance.
- Contributed to migrating ticket management from GLPI to ServiceNow, improving workflow automation, routing, and operational visibility.
- Produced reusable troubleshooting guides and knowledge-base content, improving consistency, internal knowledge sharing, and user guidance.

SELECTED CLOUD & AUTOMATION PROJECTS

GCP Fortress Architecture | Terraform | GCP | GitHub Actions

- Designed a modular Terraform blueprint for private GCP web infrastructure using a custom VPC, private subnet, regional managed instance group, global load balancer, IAP-only SSH, least-privilege service accounts, and GCS remote state.
- Implemented CI checks for Terraform formatting, validation, static security analysis, and pull-request planning.

GCP Kube Vanguard | Terraform | GKE | IAM | CI/CD

- Built a modular private GKE design with private nodes, Cloud NAT, Artifact Registry, Workload Identity, least-privilege IAM, and isolated network ranges.
- Designed keyless GitHub Actions authentication through Workload Identity Federation for infrastructure validation and container delivery workflows.

CloudOps Rescue Kit | Linux | Bash | Docker | Monitoring

- Created a Linux and Docker operations toolkit for VPS diagnostics, endpoint health checks, Compose validation, volume backups, restore testing, and lightweight Uptime Kuma monitoring.
- Added automated demo-lab evidence and CI workflows to produce repeatable operational reports, backup checksums, and structured incident handovers.

CERTIFICATIONS

Google Cloud Associate Cloud Engineer (ACE) | Google | Issued February 2026

EDUCATION

Higher Technician Diploma (BTS) in Database Management | INSFP Baiche Abdelkader, Sétif, Algeria | 2017 - 2021

Relevant coursework: Database architecture, SQL, database administration, and IT systems
